

DEMO DATA ? NOT FOR RESEARCH RESULTS

Candidate: Jordan Lee

File: resume_02_backend_alt_headings.txt

PROFILE

Backend engineer specializing in distributed systems, real-time message brokers, and document databases with Node.js and Express.js.

TECHNICAL EXPERTISE

Languages: JavaScript, TypeScript, Go

Server: Node.js, Express.js, Docker

Datastores: MongoDB, Redis, PostgreSQL

Tools: Git, CI/CD, Postman

PROFESSIONAL EXPERIENCE

Backend Developer

Nova Labs

Jun 2021 ? Dec 2023

? Implemented high-throughput asynchronous messaging services using Node.js and Redis.

? Structured document storage schemas in MongoDB and relational tables in PostgreSQL.

? Automated test suites using Jest and Postman, achieving 85% code coverage across endpoints.

? Streamlined continuous integration deployments using Git and Docker container workflows.

KEY PROJECTS

Real-time Notification Engine

? Designed event-driven notification system processing real-time websocket connections with Node.js and Redis.

? Containerized deployment using Docker and automated integration pipelines via CI/CD.

ACADEMICS

Bachelor of Engineering

City College of Engineering

CGPA: 7.8

2017 ? 2021

COURSES

MongoDB Certified Developer

Node.js Application Developer
